Notes to the Condensed Interim Financial Statements

For the three and nine months ended September 30, 2021 and 2020

*(Unaudited - Expressed in Canadian Dollars Unless Otherwise Noted)*

### **1. NATURE OF OPERATIONS**

New Found Gold Corp. (the “Company”) was incorporated on January 6, 2016, under the Business Corporations Act in the Province of Ontario. On June 23, 2020, the Company continued as a British Columbia corporation under the Business Corporations Act in the Province of British Columbia. The Company’s registered office is located at Suite 2600 – 595 Burrard Street, Vancouver, British Columbia V7X 1L3.

The Company is a mineral exploration company engaged in the acquisition, exploration and evaluation of resource properties with a focus on gold properties located in the Provinces of Newfoundland and Labrador and Ontario, Canada. The Company’s exploration and evaluation assets presently have no proven or probable reserves, and on the basis of information to date, it has not yet determined whether these properties contain economically recoverable resources. The recoverability of amounts shown for exploration and evaluation assets are dependent upon the existence of economically recoverable reserves, the ability of the Company to obtain necessary financing to complete the development of those reserves and upon future profitable production.

On March 11, 2020, the World Health Organization declared the global outbreak of a novel coronavirus identified as “COVID-19” a global pandemic. In order to combat the spread of COVID-19, governments worldwide have enacted emergency measures including travel bans, legally enforced or self-imposed quarantine periods, social distancing and business and organization closures. These measures have caused material disruptions to businesses, governments and other organizations resulting in an economic slowdown and increased volatility in national and global equity and commodity markets. Central banks and governments, including Canadian federal and provincial governments, have reacted with significant monetary and fiscal interventions designed to stabilize economic conditions. The duration and impact of the COVID-19 outbreak is unknown at this time, as is the efficacy of any interventions. Significant economic and social impacts have limited the Company’s ability to continue its exploration and evaluation activities as intended. It is not possible to reliably estimate the length and severity of these developments and the impact on the financial results and condition of the Company and its operations in future periods.

These condensed interim financial statements were approved by the Board of Directors of the Company on November 22, 2021.

### **2. SIGNIFICANT ACCOUNTING POLICIES**

The principal accounting policies applied in the preparation of these financial statements are set out below.

#### **a) Statement of compliance**

The Company’s condensed interim financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”), as applicable to interim financial reports including International Accounting Standards 34 “Interim Financial Reporting” issued by the International Accounting Standards Board (“IASB”).

These condensed interim financial statements do not include all the information and note disclosures required by IFRS for annual financial statements and should be read in conjunction with the annual financial statements for the year ended December 31, 2020, which have been prepared in accordance with IFRS, as issued by the IASB and included in Part I of the Handbook of the Chartered Professional Accountants of Canada and consistent with interpretations of the International Financial Reporting Interpretations Committee (“IFRIC”).

The policies applied in these condensed interim financial statements are the same as those applied in the most recent annual financial statements and were consistently applied to all the periods presented.

Notes to the Condensed Interim Financial Statements

*(Unaudited - Expressed in Canadian Dollars Unless Otherwise Noted)*

### **2. SIGNIFICANT ACCOUNTING POLICIES (continued)**

#### **b) Basis of presentation**

These condensed interim financial statements are expressed in Canadian dollars and have been prepared on a historical cost basis except for financial instruments classified as subsequently measured at fair value. In addition, these financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

#### **c) Significant Accounting Estimates and Judgments**

The preparation of these condensed interim financial statements requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and reported amounts of expenses during the reporting period. Actual outcomes could differ from these estimates.

These condensed interim financial statements include estimates which, by their nature, are uncertain. The impacts of such estimates may be pervasive throughout the financial statements, and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised and future periods if the revision affects both current and future periods. These estimates are based on historical experience, current and future economic conditions and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Significant assumptions about the future and other sources of estimation uncertainty that management has made at year end that could result in a material adjustment to the carrying amounts of assets and liabilities, in the event that actual results differ from assumptions made, relate to the following:

##### **(i) Critical accounting estimates**

###### *Valuation of Options Granted and Warrants Issued*

The fair value of common share purchase options granted and warrants issued is determined at the issue date using the Black-Scholes option pricing model. The Black-Scholes model involves six key inputs to determine the fair value of an option, which are: risk-free interest rate, exercise price, market price at the grant date, expected dividend yield, expected life, and expected volatility. Certain of the inputs are estimates that involve considerable judgment and are or could be affected by significant factors that are out of the Company's control. The Company is also required to estimate the future forfeiture rate of options based on historical information in its calculation of share-based payments expense. These estimates impact the values of share-based compensation expense, share capital, and reserves.

###### *Fair Value of Financial Derivatives*

Investments in warrants that are not traded on a recognized securities exchange do not have a readily available market value. When there are sufficient and reliable market inputs, a Black-Scholes option pricing model is used. The Black-Scholes model involves six key inputs to determine the fair value of a warrant, which include: risk free interest rate, exercise price, market price at the grant date, expected dividend yield, expected life, and expected volatility. Certain of the inputs are estimates that involve considerable judgment and are or could be affected by significant factors that are out of the Company's control.

### **2. SIGNIFICANT ACCOUNTING POLICIES (continued)**

#### **c) Significant Accounting Estimates and Judgments (continued)**

##### **(i) Critical accounting estimates (continued)**

###### *Computation of Income Taxes*

The determination of tax expense for the period and deferred tax assets and liabilities involves significant estimation and judgment by management. In determining these amounts, management interprets tax legislation in a variety of jurisdictions and make estimates of the expected timing of the reversal of deferred tax assets and liabilities. Management also makes estimates of future earnings which affect the extent to which potential future tax benefits may be used.

The Company is subject to assessments by taxation authorities, which may interpret legislation differently. These differences may affect the final amount or the timing of the payment of taxes. We provide for such differences where known based on our best estimate of the probable outcome of these matters.

###### *Shares Issued to Acquire Exploration and Evaluation Assets*

From time to time, the Company issues common shares in the course of acquiring exploration and evaluation assets. When shares are issued without cash consideration, the transaction is recognized at the fair value of the assets received. In the event that the fair value of the assets cannot be reliably determined, the Company will recognize the transaction at the fair value of the shares issued. These estimates impact the value of share capital and exploration and evaluation assets.

###### *Valuation of Flow-Through Premium*

The determination of the valuation of flow-through premium and warrants in equity units is subject to significant judgment and estimates. The flow-through premium is valued as the estimated premium that investors pay for the flow-through feature, being the portion in excess of the market value of shares without the flow-through feature issued in concurrent private placement financing.

##### **(ii) Critical accounting judgments**

###### *Impairment of Exploration and Evaluation Assets*

Management is required to assess impairment in respect to the Company's intangible mineral property interests. The triggering events are defined in IFRS 6. In making the assessment, management is required to make judgments on the status of each project and the future plans towards finding commercial reserves. The carrying value of each exploration and evaluation asset is reviewed regularly for conditions that may suggest impairment. This review requires significant judgment. Factors considered in the assessment of asset impairment include, but are not limited to, whether there has been a significant adverse change in the legal, regulatory, accessibility, title, environmental or political factors that could affect the property's value; whether there has been an accumulation of costs significantly in excess of the amounts originally expected for the property's acquisition, development or cost of holding; and whether exploration activities produced results that are not promising such that no more work is being planned in the foreseeable future. If impairment is determined to exist, a formal estimate of the recoverable amount is performed and an impairment loss is recognized to the extent that the carrying amount exceeds the recoverable amount. Management has determined that there were indicators of impairment as at September 30, 2021 and has impaired \$28,604 in exploration and evaluation assets during the period ended September 30, 2021 (nine months ended September 31, 2020 - \$Nil). Refer to Note 3 for further information.

#### (i) Queensway Project – Gander, Newfoundland

As at September 30, 2021, the Company owns a 100% interest in 86 (December 31, 2020 – 86) mineral licenses including 6,041 (December 31, 2020 – 6,041) claims comprising 151,030 (December 31, 2020 – 151,030) hectares of land located in Gander, Newfoundland. The project rights were acquired by map staking mineral licenses and making staged payments in cash and common shares of the Company from 2016 through 2019 under nine separate, fully executed option agreements. The Queensway Project carries various net smelter return (“NSR”) royalties ranging from 0.6% to 2.5% which can be reduced to 0.5% to 1.6%, at the Company’s option, with payments ranging from \$250,000 to \$1,000,000 to the optionors. The total cost of the NSR’s that may be purchased at the Company’s discretion is \$5,250,000.

During the period ended September 30, 2021, the Company sold a stand-alone claim that was part of the Queensway Project (claim 023951M also known as Unknown Brooke claim) to Long Range Exploration Corporation (“Long Range”) for non-cash consideration of 5,000,000 common shares of Long Range valued at \$500,000 (Note 5). The Company recognized a gain on sale of exploration and evaluation assets in the amount of \$499,415 and derecognized exploration and evaluation assets at their carrying value of \$585. The Company retained a 1% NSR on future production from the mineral claim, 0.5% of which can be repurchased by Long Range for \$750,000.

Subsequent to September 30, 2021, the Company entered into three royalty purchase agreements with arm’s length royalty holders (together, the “Vendors” and each, a “Vendor”), to purchase 100% of each Vendor’s royalty interests, each equal to 0.2%, for an aggregate of 0.6% of net returns from the Company’s Linear and JBP Linear properties (the “Royalty Interests”) for cash consideration of \$1,300,000 and the issuance of 152,941 common shares in the capital of the Company to each Vendor, for aggregate cash consideration of \$3,900,000 and aggregate share consideration of 458,823 common shares. The royalty purchase agreements are subject to the satisfaction of customary closing conditions and TSX Venture Exchange approval.

As at September 30, 2021, the Company is required to spend approximately \$901,251 (December 31, 2020 - \$1,844,956) over the next 12 months to keep all claims owned in good standing.

The following table summarizes the Company's long-term commitments as at December 31, 2020:

	1 Year	2 Years	3 Years	4-5	More than
	\$	\$	\$	Years	5 Years
	\$	\$	\$	\$	\$
Lease obligations	53,201	-	-	-	-

### 14. FINANCIAL INSTRUMENTS

The Company thoroughly examines the various financial instrument risks to which it is exposed and assesses the impact and likelihood of those risks. These risks may include credit risk, liquidity risk, currency risk, and interest rate risk. Where material, these risks are reviewed and monitored by the Board of Directors.

#### (a) Fair Values

Financial assets and liabilities measured at fair value are recognized according to a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets and liabilities and the lowest priority to unobservable inputs. The three levels of fair value hierarchy are as follows:

### Notes to the Condensed Interim Financial Statements

For the three and nine months ended September 30, 2021 and 2020

(Unaudited - Expressed in Canadian Dollars Unless Otherwise Noted)

#### 14. FINANCIAL INSTRUMENTS (continued)

Level 1 – Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.

Level 2 – Quoted prices in markets that are not active, or inputs that are observable, either directly or indirectly, for substantially the full term of the asset or liability.

Level 3 – Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (supported by little or no market activity).

The Company's financial instruments measured at fair value are its investments, which include equities and warrants held. The fair value of equities held is determined using closing prices at the statement of financial position date with any unrealized gain or loss recognized in profit or loss. The Company's warrants held are not traded on an active exchange and are valued using the Black-Scholes option pricing model using assumptions including risk-free interest rate, expected dividend yield, expected volatility and expected remaining life of the warrant which are supported by observable market conditions and as such are classified within level 2 of the fair value hierarchy.

The carrying values of other financial instruments, including cash, deposits and amounts receivable, and accounts payable approximate their fair values due to the short-term maturity of these financial instruments.

		Level 1	Level 2	Level 3	Total
		\$	\$	\$	\$
Recurring measurements	Carrying amount	Fair value			
Investments, at fair value					
September 30, 2021	34,353,761	29,602,589	4,251,172	500,000	34,353,761
December 31, 2020	21,089,997	17,132,629	3,957,368	-	21,089,997

There was no movement between levels during the nine months ended September 30, 2021.

The following table represents the changes in fair value measurements of financial instruments classified as Level 3. Within Level 3, the Company includes private company investments which are not quoted on an active exchange. These financial instruments are measured at fair value utilizing non-observable market inputs.

	Balance at January 1	Additions	Net Unrealized Gains/Losses	Balance at September 30
	\$	\$	\$	\$
2021	-	500,000	-	500,000
2020	-	-	-	-

The addition in 2021 relates to the investment in shares of Long Range (Note 5(i)). Long Range is a private company without observable market prices for its common shares and is measured at its estimated fair value based on valuation techniques that use inputs derived by management. The key assumptions used in the valuation of this investment include, but are not limited to, the value at which a recent financing was completed by the investee, company-specific information, review of adjusted net book values, liquidation analysis, trends in general market conditions, share performance of comparable publicly-traded companies and a strategic review. There has been no change in the estimated fair value of this investment and it has been estimated at \$500,000 at September 30, 2021.

### **14. FINANCIAL INSTRUMENTS (continued)**

#### **(b) Financial Instrument Risk Exposure**

##### ***Credit risk***

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. The Company does not have financial instruments that potentially subject the Company to credit risk. Overall, the Company's credit risk has not changed significantly from the prior year. Sales taxes recoverable are due from the Canada Revenue Agency and the Company places its cash with financial institutions with high credit ratings, therefore in management's judgment, credit risk is low.

There have been no changes in management's methods for managing credit risk during the nine months ended September 30, 2021 and 2020.

##### ***Liquidity risk***

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company has in place a planning and budgeting process to help determine the funds required to ensure the Company has the appropriate liquidity to meet its operating and growth objectives. The Company has historically relied on issuance of shares to fund exploration programs and may require doing so again in the future. As at September 30, 2021, the Company has total liabilities of \$15,745,565 and cash of \$71,751,384 which is available to discharge these liabilities (December 31, 2020 – total liabilities of \$635,083 and cash of \$47,731,125). Accordingly, in management's judgment, liquidity risk is low.

There have been no changes in management's methods for managing liquidity risk since December 31, 2020.

### **15. CAPITAL MANAGEMENT**

#### ***Market risk***

##### ***(i) Currency risk***

Financial instruments that impact the Company's net earnings or other comprehensive income due to currency fluctuation include cash accounts denominated in US dollars. Fluctuations in the exchange rate between the US dollar and the Canadian dollar at September 30, 2021 would not have a material impact on the Company's net earnings and other comprehensive income.

##### ***(ii) Interest rate risk***

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate due to changes in market interest rates. As the Company deposits its short-term investments into fixed rate guaranteed investment certificates with one-year maturities or less, the Company is not exposed to interest rate risk.

##### ***(iii) Commodity price risk***

Commodity price risk is defined as the potential adverse impact on earnings and economic value due to commodity price movements and volatilities. The Company's property has exposure to predominantly gold. Commodity prices, especially gold, greatly affect the value of the Company and the potential value of its property and investments.

### **15. CAPITAL MANAGEMENT (continued)**

#### *(iv) Equity price risk*

Equity price risk is the risk that the fair value of or future cash flows from the Company's financial instruments will significantly fluctuate because of changes in market prices. The Company is exposed to market risk in trading its investments in unfavorable market conditions which could result in dispositions of investments at less than favorable prices. Additionally, the Company adjusts its investments to fair value at the end of each reporting period. This process could result in write-downs of the Company's investments over one or more reporting periods, particularly during periods of overall market instability. The sensitivity of the Company's net loss to changes in market prices at September 30, 2021 would change the Company's net loss by \$3,435,376 as a result of a 10% change in the market price of its investments.

There have been no changes in management's methods for managing market risks since December 31, 2020.

The Company's objectives when managing capital are:

- To safeguard our ability to continue as a going concern in order to develop and operate our current projects;
- Pursue strategic growth initiatives; and
- To maintain a flexible capital structure which lowers the cost of capital.

In assessing our capital structure, we include in our assessment the components of equity consisting of common shares, stock options and warrants, and deficit that as at September 30, 2021 totalled \$97,639,023 (December 31, 2020 - \$72,901,845). In order to facilitate the management of capital requirements, the Company prepares annual expenditure budgets and continuously monitors and reviews actual and forecasted cash flows. The annual and updated budgets are monitored and approved by the Board of Directors. To maintain or adjust the capital structure, the Company may, from time to time, issue new shares, issue new debt, repay debt or dispose of non-core assets. The Company's current capital resources are sufficient to carry out our exploration plans and support operations through the current operating period.

The Company is not subject to any capital requirements imposed by a regulator.

There were no changes in the Company's approach to capital management during the nine months ended September 30, 2021.
